PROFESSIONAL SUMMARY

QA Automation Engineer experienced in designing and executing UI and API test frameworks using Selenium (Python), PyTest, and Cypress. Strong background in regression, backend validation with SQL, Agile environments, CI/CD integration, and defect lifecycle management. Focused on scalable automation and improving release quality.

TECHNICAL SKILLS

Automation: Selenium (Python), PyTest, Cypress, POM
API: Python Requests, Postman, REST validation
Testing: Functional, Regression, Integration, Smoke, UAT
Database: SQL (Data validation, JOINs)
Tools: Git, GitHub, GitHub Actions, JIRA
Methodologies: Agile, SDLC, STLC

PROFESSIONAL EXPERIENCE

QA Analyst | Elixderm (Remote)
Jul 2025 – Present

- Executed functional and regression testing prior to production releases
- Designed structured test cases and tracked defects in JIRA through full lifecycle
- Collaborated with developers to validate requirements and feature behavior
- Conducted pre-release validation to ensure production stability

Software Tester / QA Analyst | Print Club (Contract)
Jan 2024 – Jul 2025

- Executed UI, regression, integration, and UAT testing in Agile sprints
- Logged and managed 50+ defects, improving release reliability
- Performed SQL validation of backend reporting and customer data
- Contributed to ~20% reduction in UAT cycle time

QA AUTOMATION PROJECTS

UI & API Automation Framework (Python, Selenium, PyTest)

- Built scalable POM-based framework with reusable components
- Automated 15+ regression scenarios using PyTest fixtures and parametrization
- Integrated logging, HTML reporting, and GitHub Actions CI
- Reduced manual regression effort by ~30%

API & Backend Validation

- Validated REST APIs using Python Requests
- Performed structured response assertions and payload verification
- Executed SQL queries to validate database consistency post-API calls

---

EDUCATION

Master of Management Analytics (MMA), Queen’s University (2026–2027)
Full-Stack Web Development Certificate, University of Toronto (2023)
Selenium WebDriver with Python – Udemy
